Car Price Guide

A small selection of cars available through the Motability Scheme

To see the full range of cars visit **motability.co.uk**

Get started

Browse our latest list of new cars at **[motability.co.uk](https://www.motability.co.uk)**.

Find a choice of dealerships near you at **[motability.co.uk/findadealer](https://www.motability.co.uk/findadealer)**.

Or call one of our team on **0800 093 1000** to chat through your options.

Welcome to worry-free motoring

The Motability Scheme provides a unique leasing package designed for the benefit of people with a disability. You can enjoy worry-free, affordable motoring as you'll have the freedom and reassurance of a new car with none of the worries associated with buying and running an older one. In this guide you'll find just a small selection of cars, grouped by car type and manufacturer. The full list of cars is available at motability.co.uk.

Are you eligible?

If you receive one of the following allowances and have at least 12 months remaining on the award, you are eligible to lease through the Motability Scheme:

- The Higher Rate Mobility Component of the Disability Living Allowance (£57.45 a week)
- The Enhanced Rate of the Mobility Component of Personal Independence Payment (£57.45 a week)
- The War Pensioners' Mobility Supplement (£64.15 a week)
- The Armed Forces Independence Payment (mobility element £57.45 a week)

You simply exchange your mobility allowance for the car of your choice.

Make the right choice in three simple steps

To help you choose the car that best suits your needs and your budget, we've broken the process down into three simple steps over the next few pages – working out what type of car is right for you, finding a car within your budget and finally, test driving your shortlist. Of course your dealer will be happy to guide you through the whole process.

What's included?

Whatever car you pick, the price already includes insurance, servicing, MOTs, breakdown assistance, new tyres and windscreen repair as part of our all-inclusive package. And we know that not all of our customers drive so you can add up to two named drivers too. These can be either yourself, friends, family or carers.

For more information download a helpful information guide from motability.co.uk/downloads or call **0800 093 1000** to order a free copy.

This Car Price Guide is updated regularly

The prices in this guide are for applications submitted through a Motability Scheme dealership between 1 October and 31 December 2016 and are updated every three months. We offer a firm 'price guarantee', which means the price confirmed when your order is accepted is the price you pay when you collect your car.

Who's involved

We are Motability Operations Ltd, a company authorised and regulated by the Financial Conduct Authority. All Motability Scheme vehicles are leased to customers by us.

Contents

Choosing a car to suit you	4
How to use this price guide	7

Wheelchair Accessible Vehicles	34

It's easy to search the full range of cars at motability.co.uk

Our new online search tool allows you to search by a number of different options according to your needs. You can even create a shortlist and compare up to four of your favourite cars side by side.

Suitability

1. Which type of car suits your needs?

The first thing you should think about is what you need from a car. What are the things you are going to be doing and what type of car best meets those needs?

Here are some questions to consider as a starting point:

- How many people are going to travel in it regularly?
- Will you be doing a lot of motorway driving?
- Do you mainly do short journeys in built up areas?
- How much boot space do you need?
- Is parking a problem?
- Are you able to change gear easily?
- If you have a mobility aid, will it fit easily into the car?
- Do you need to take your scooter or wheelchair with you?

For instance, if you mainly drive in built up areas with low speed limits, a petrol engine might be more suitable. This is because most diesel vehicles are fitted with Diesel Particulate Filters (DPFs) and many of these need to be regenerated by regularly travelling at speeds over 40mph. If you have a big family you may want to consider a large family car or MPV. If you find it difficult to change gear easily, an automatic might be a good choice.

You'll also need to think about travelling in the car day to day. Small changes in type, model or specification can have a big impact on your comfort or the car's suitability. For example, seat height, door opening angle and positioning of the seat belts can all make a big difference. A good place to start is to think about your current car, if you have one, and decide what you like and dislike about it. It may be useful to refer to the quick checklist on **page 6**.

Adaptations and Wheelchair Accessible Vehicles

For information on adaptations to make driving or travelling easier (such as hand or steering controls) and Wheelchair Accessible Vehicles (specially designed to accommodate your wheelchair), please see **pages 29 and 34** of this guide.

Which type of car will be right for you?

You can see all the cars listed by type, with a short description of what each category means e.g. hatchback, MPVs, 4x4, etc. on **pages 10-16** of this guide. If you are at all unsure as to what's right for you, then your local dealer will be glad to help. Your dealer will take you through the Suitability Questionnaire, which is designed to make sure the car you're considering, and the Motability Scheme, is right for you. To see the full list of cars available, go to **motability.co.uk**.

Have difficulty parking?

Need to carry pets?

Transporting a wheelchair?

Do much motorway driving?

Want extra space?

Affordability

2. Which cars come within your budget?

Above all, we aim to make leasing a brand new car affordable. So once you have decided what sort of car would suit you best, you need to know which ones are within your budget.

Keeping fuel costs down

Don't forget that your lease includes everything, except fuel, to provide you with worry-free motoring, so you will need to take into account the car's fuel costs. To keep the running costs down you may want to consider a more fuel efficient engine. Each car listed has a 'miles per gallon' (mpg) figure; cars with a higher mpg cost less to run and usually provide lower CO₂ emissions over the course of your lease.

Remember the mpg given is a guide to help you compare cars and is based on test conditions. The actual mpg each car achieves in real world driving is likely to be lower than the official figure.

To give you an idea of costs, for each car listed we have highlighted the average annual fuel costs which can help you compare between cars and see which option might save you money.

Trade-in your old car

You can trade-in your privately owned car to help finance the Advance Payment of your new car.

Many Motability Scheme dealerships will offer this and the dealer will arrange the trade-in with you directly. To find a dealer offering trade-in go to [motability.co.uk /findadealer](https://www.motability.co.uk/findadealer).

Choose a car to suit your budget

When you lease a car through the Motability Scheme, there are three pricing options. However, no matter how much you pay or what car you choose, all customers will enjoy the same all-inclusive package of insurance, breakdown cover, servicing, tyres and glass replacement. The three pricing options are:

- 1 Cars that cost less than your mobility allowance** – a range of over 150 cars on the Scheme cost less than your mobility allowance, meaning the remainder will be paid directly to you by the Department for Work and Pensions (DWP). These cars are available to lease at a fixed weekly amount for the whole of your agreement and any increases in your allowance that the DWP makes will be paid directly to you. For more information, see page 9 of this guide.
- 2 Cars that cost all of your mobility allowance** – we have a range of around 400 cars that cost the same as your allowance. There's no Advance Payment and you simply swap the whole of your weekly mobility allowance for the car of your choice.
- 3 Cars that cost all of your mobility allowance and also have an Advance Payment** – you can increase your choice of cars by topping up your allowance with a non-refundable upfront payment which we call the Advance Payment. This payment covers the difference between your allowance and the total cost of the lease over the course of your agreement.

The full list of cars
is available at
[motability.co.uk](https://www.motability.co.uk)

Test drive

3. Try out a few cars before you finally decide

Once you've worked out what type of car you want and looked at the available options, it's very important that you take a few different cars out for a test drive.

A test drive is the only way to find out properly whether a car is right for you and your dealer will be more than happy to arrange this. Even if you choose a car similar to the one you drive now, you may well discover that the manufacturer has made a number of changes and alterations to the latest model, so it is advisable to take a test drive to make sure you are still happy with your choice.

There are three parts to a successful test drive:

- 1. Ins and outs:** Take time to check you are happy about getting in and out of the vehicle.
- 2. Dealer demonstration:** Ask the dealer to show you around the vehicle and explain all the features.
- 3. On the road:** Take the car out on the road with the dealer. Check how comfortable it is to drive, or travel in, and how easy it is to park.

Take your time on your drive and remember that the final decision is always yours. It's also worth bearing in mind that the delivery times will differ for different makes and models. Ask your dealer what the expected delivery time might be as it may affect your choice.

Test driving automatics, adapted cars and WAVs

If you want to test drive an automatic car you will need to arrange this when you call your dealer as there are often less of these models available on site. To try out adaptations, it may be worth contacting a Driving Mobility Centre – see **page 29** for further details. Meanwhile, if you are opting for a WAV, specialist WAV suppliers will travel to your home to help make this easier.

Use this handy checklist to mark each feature of the car you test drive out of 10. Add up the totals and see which one comes out on top!

Test drive feature	Car 1	Car 2	Car 3
Getting in and out			
Opening and closing the door			
Seat height and adjustment			
Headroom			
Reaching for the seatbelt			
Visibility

1 Vehicle descriptions:

This guide uses abbreviations for the vehicle descriptions. We've included a glossary on a fold out at the back of this guide.

2 Fuel type:

This shows you what kind of fuel the car takes, such as Petrol (P), Diesel (D), Electric (E) or if the car is a Hybrid (H).

3 Automatic:

This shows which cars are classed as automatic (●) or semi-automatic (○). Cars classified as semi-automatic will vary from model to model.

4 DLA, PIP or AFIP holders:

These prices are applicable for recipients of the Higher Rate Mobility Component (HRMC) of the Disability Living Allowance (DLA), the Enhanced Rate of the Mobility Component (ERMC) of Personal Independence Payment (PIP) and Armed Forces Independence Payment.

5 WPMS holders:

These prices are applicable for recipients of War Pensioners' Mobility Supplement (WPMS.)

6 Advance Payment:

The non-refundable amount payable upfront to your dealer in addition to your weekly mobility allowance.

7 Weekly Rental:

This shows the relevant amount of mobility allowance that will be paid to Motability Operations Ltd each week. Total allowance means that the total amount of the higher rate mobility allowance is payable in exchange for your car. From 8 April 2015, total allowance is £57.45 for recipients of DLA and ERM of PIP; and £64.15 for recipients of WPMS.

8 Average mpg:

This shows the average number of miles a car can travel for every gallon of fuel. This is for comparison purposes only and is likely to be lower than the figure actually achieved.

9 Average fuel:

This shows an approximate annual fuel cost for comparison purposes only. It is based on the average annual mileage driven by Motability Scheme customers (8,300) and the latest AA fuel price report.

10 CO₂ emissions:

This shows the emission levels in grammes per kilometre (g/km). A green tick highlights low emission vehicles which have a CO₂ of 100g/km or below.

Points to note:

- The terms, conditions, prices, model features and adaptations set out in this car price guide are correct at time of going to print. However, these may be subject to adjustment or withdrawal in the event of any changes taking place which affect the cost of the provision of the lease agreement or vehicle availability. As higher rate mobility allowances differ on the Isle of Man, customers living here may be subject to an additional fee.
- Images are supplied for illustrative purposes only. MPG figures quoted are combined, vehicle specifications are provided by Glass's Information Services Limited and CAP Automotive Limited.

all figures, specifications and details are indicative only and may vary. The internal and external specification of the car you choose may differ. Customers are advised to check any specifically required features with their dealer at the point of application. Please note that Motability Operations Limited accepts no liability in relation to the accuracy of the information provided by third parties as set out herein.

- The lease agreement package with Motability Operations Limited comes with a mileage allowance of 60,000 for three year leases and 100,000 for five year WAV agreements. If you go over this amount, you will be charged 5p for each extra mile.

- Insurance is included, however, in the event of a claim you will be asked to pay an excess unless a third party is found to be at fault. Full insurance details are included in the Insurance Cover Booklet supplied with the Motability Scheme car.
- Restrictions and higher excesses are applied to drivers aged under 25, speak to your dealer for more information.
- Metallic paint comes as standard.
- For full terms and conditions please visit **motability.co.uk** or contact our Customer Services team on **0300 456 4566**.

Cars with lower emissions

Cars with a CO₂ emission level of 100g/km or less are considered low emission models, and throughout the guide these cars are highlighted with a green

tick in the CO₂ column. These cars not only have a less harmful effect on the environment, but they tend to be more fuel efficient, giving you more

miles per gallon (mpg) and helping you to save pounds at the pump. Here are just a few of the low emission vehicles on the Scheme.

Cars that cost less than your allowance

Over 150 cars are available to lease for less than your weekly mobility allowance, so you keep the difference. No Advance Payment is needed, you simply pay a fixed weekly amount for the whole lease. The

remainder of your allowance will be paid directly to you by the Department for Work and Pensions (DWP). In the table below, the 'You Keep' column shows how much this will be. In the rest of the guide, cars

that cost less than your allowance are highlighted in yellow. To work out what you keep for each car, just take your current allowance rate, and subtract the Weekly Rental.

Selection of cars by type

Over the next few pages we've selected just a few of the cars available and arranged them by car type. Whether you're looking for a small hatchback, an MPV to fit

all the family or something a bit more sporty, we have plenty of options that'll suit your needs and your budget. To help you understand the vehicle descriptions, please

see the fold out glossary at the back of this guide. Don't forget, to browse the complete range of over 2,000 cars, including hundreds of automatics, you can visit motability.co.uk.

CO₂

2-3 door small

Citroen C1 1.0 67bhp Feel 3dr

ADVANCE PAYMENT
DLA, PIP or AFIP: £0
WEEKLY RENTAL:
£52.25

2-3 door cars generally have wider doors with larger opening angles. This may make access easier, however be aware that closing the door and fitting in narrow parking spaces may be more difficult. Smaller vehicles tend to have lower CO₂ emissions than the larger vehicles.

[For similar models see below or visit our website.](#)

Considerations

- Wider front doors
- Lower emissions
- Smaller boot space
- Seatbelts further back

Small automatic

**Renault Captur
1.2 118bhp Dynamique Nav 5dr**
 ADVANCE PAYMENT
 DLA, PIP or AFIP:
 £195

These vehicles have the same benefits as their manual equivalents (see previous 'small' sections) but they are also automatic. Many of our customers prefer an automatic to make driving easier, especially around town. Automatic transmission is also essential for nearly all hand control adaptations.

For similar models see below or visit our website.

Considerations

- Lower emissions
- Smaller boot space
- Automatics are essential for some hand controls

2-3 door medium

Considerations

**Volkswagen Golf
1.6TDI 108bhp
Match Edition 3dr**
 ADVANCE PAYMENT
 DLA, PIP or
 AFIP: **£199**

Medium sized cars are often available in hatchback and will have a slightly bigger boot than a standard small car. The 2-3 door models will have a wider door opening angle and the seatbelts will be set further back.

[For similar models see below or visit our website.](#)

- Wider front doors
- Seating for 5 adults
- Slightly larger boot space

Audi A3 1.0 TFSI 113bhp SE 3dr	P		£0	T/A	£0	£57.99	N/A	N/A	104

These vehicles have the same benefits as other medium sized cars but they are also automatic. Many of our customers prefer an automatic to make driving easier, especially around town. Automatic transmission is also essential for nearly all hand control adaptations.
 For similar models see below or visit our website.

Considerations

- Passenger numbers
- Transmission type
- Automatics are essential for some hand controls

MPV

Vauxhall Zafira Tourer 1.4i 16v Turbo 138bhp Design 7st
 ADVANCE PAYMENT
 DLA, PIP or AFIP: £0

Multi-purpose vehicles (MPVs) benefit from extra headroom, legroom and higher seats, which some people may find easier to access. Some MPVs will have 7 seats – look for '7st' in the vehicle description, or check online. MPVs often come with higher emission levels and a lower average miles per gallon.

For similar models see below or visit our website.

Considerations

- Storage space
- Number of passengers
- Ease of access
- Fuel consumption

Estate**Honda Civic
1.8 140bhp
S Estate 5dr**

ADVANCE PAYMENT
DLA, PIP or AFIP: £0

A typical estate will be an extended version of an existing saloon or hatchback with useful storage space for mobility aids etc. in the boot. If you are considering an estate but haven't driven one before it is important to take a test drive as they are longer than standard vehicles, which may affect how you get around in your local area.

For similar models see below or visit our website.

Considerations

- More storage space for mobility aids
- Longer vehicle

Coupe/Convertible

Considerations

Mazda MX-5 1.5 129bhp SE Convertible 2dr

ADVANCE PAYMENT
DLA, PIP or AFIP:
£949

A coupe is a small car, usually with 2 doors, which will seat either 2 or 4 people. They are sporty looking cars, with a small, saloon style boot. A convertible is where the roof of the vehicle can come off – usually this will go into the boot of the car minimising the storage space.

For similar models see below or visit our website.

- Sporty looking
- Limited storage space
- Seating space limited

SUV/4x4

Considerations

Jeep Renegade 1.6 108bhp Sport 5dr

ADVANCE PAYMENT
DLA, PIP or AFIP: £0

There are a wide range of Sport Utility Vehicles (SUVs) available on the Scheme including a number of 4x4 vehicles. SUVs may have more space for seating and luggage, and also provide good visibility as the driver's seat is often higher. Not all SUVs have four wheel drive capabilities – 4WD indicates four wheel drive vehicles.

For similar models see below or visit our website.

- Type of environment you will drive in
- Height and size of vehicle

Selection of cars by manufacturer

With cars from all the main manufacturers to choose from, it can be difficult to know where to start. To help get you on the right track, we've selected some of the best prices available from each of our manufacturers. To help you

understand the vehicle descriptions, please see the fold out glossary at the back of this guide. Don't forget, you can go to **motability.co.uk** to search by specific make or model, and a host of other criteria to find the car that's right

for you. Once you've browsed through and considered all of the options, why not use our shortlist tool for those cars that you'd like to test drive? You can also use our website to find your local dealer.

With the Motability Scheme you can simply exchange all, or part of your mobility allowance, to lease a brand new car or Wheelchair Accessible Vehicle (WAV). Whatever car you pick, the price always includes:

Insurance from
RSA Motability

Servicing and
maintenance

Many adaptations
at no extra cost

Full RAC breakdown
assistance

Up to two
named drivers

Plus...

- Tyre repair and replacement, windscreen repair, MOTs and road tax
- 60,000 mileage allowance over three years, or 100,000 over five years for WAVs
- Support from our dedicated UK based Customer Services team

To explore our huge choice of cars and discover the best option for you visit **motability.co.uk** or call one of our team **0800 093 1000**

Adaptations

Adaptations are a range of devices that can be fitted to your car to help make driving, or travelling, easier. Typically, adaptations fall into three categories: they can help you drive, stow your wheelchair or scooter, or get in and out of the car.

We currently offer around 400 different adaptations through our Motability Scheme Managed Adaptations Programme, where the adaptations are fitted before your car is delivered and the price of the adaptation is paid along with the Advance Payment to your dealer at the start of the lease.

The adaptations included over the next few pages are just a sample of the selection available – for a full list please see our website, [motability.co.uk](https://www.motability.co.uk). To take advantage of the prices listed, you must

order any adaptations you need through your Motability Scheme dealer at the same time that you order your car. All prices include installation and any maintenance that may be required. Further adjustments carried out by your installer may result in an additional charge.

Choosing the right adaptation

Adaptations are not suitable for every type of car so it's important to consider the adaptations you need before you choose your car. Your local adaptation installer will be happy to help. There are more than 100 installers across the UK and you can find all their contact details, and information on which adaptations they provide, at [motability.co.uk/findadealer](https://www.motability.co.uk/findadealer). If you don't have internet access you can call us on **0800 093 1000**.

If you've never driven with an adaptation before, it may be worth visiting a Driving Mobility Centre for an assessment. These centres offer independent, professional information and advice and can help you find the adaptations that best suit your particular needs. There are a number of Centres across the UK, to find your nearest centre, visit [drivingmobility.org.uk](https://www.drivingmobility.org.uk) or call **0800 559 3636**. Please note that there may be a charge for assessments.

If you'd like to see how some of our most popular adaptations work, visit [motability.co.uk/adaptationsfilms](https://www.motability.co.uk/adaptationsfilms) to watch our online videos. Here you can also download our useful brochure 'Your guide to adaptations' which explains the basics of adaptations and gets you on the road to finding the right fit for your mobility needs.

Mechanical hand controls and left foot accelerator

If you find using foot pedals for braking or acceleration difficult, you may be better off using a hand control, such as a push/pull device or a radial accelerator. There are a number of different hand controls available from different manufacturers, but the basic function is the same across most models – the foot pedals are controlled by devices installed around the steering column and wheel, allowing you to use your hands to push or pull a lever to control the speed of the car or when you need to stop. Most push/pull hand controls can be ordered with a built-in indicator switch at no extra cost.

You'll find most mechanical hand controls are available at no extra cost – visit [motability.co.uk](https://www.motability.co.uk) for a full list.

If you cannot operate the standard accelerator pedal in an automatic car, you may benefit from having a left foot accelerator fitted. This system transfers the original acceleration control of the car to an extra pedal fitted on the left side, allowing you to manage your speed in a way that's more comfortable for you. With most installations, the original accelerator pedal can still be used when the left foot pedal is not deployed, so the car can also be driven safely by any nominated drivers who do not require adaptations. We recommend seeking advice from an adaptations installer first if you have not used this type of adaptation before.

You'll find most left foot accelerators are available at no extra cost – visit [motability.co.uk](https://www.motability.co.uk) for a full list.

Both mechanical hand controls and left foot accelerators are available from the following manufacturers:

- Adaptacar
- Alfred Bekker
- Autoadapt UK
- Auto Mobility Concepts
- Brig-Ayd Controls
- Cowal Mobility Aids
- Elap Mobility
- Jeff Gosling Hand Controls
- Jim Doran Hand Controls
- McElmeel Mobility Services
- PB Conversions
- Techmobility

Speak to your local adaptation installer about which products may suit your choice of car – you'll find details on our website at [motability.co.uk](https://www.motability.co.uk)

Steering aids

If you have difficulty using a standard steering wheel, there are a number of solutions that may be able to help. A steering wheel ball can be fitted to allow for easier control. The driver simply holds the ball and uses it to move the wheel in the direction you want to go. If you're having hand controls fitted, then it is often essential to have a steering wheel ball to enable you to steer the car with one hand while operating any hand controls with the other.

	Specialist Steering Aids	From Nil

Electronic accelerator

If you have limited mobility in your legs, or find push/pull hand controls too tiring, you may find that an electronic accelerator will help. These devices transfer accelerator control to a ring positioned either above or below the steering wheel or to a trigger device adjacent to the steering column. Electronic accelerators require less effort than mechanical hand controls and will all come with a hand operated push brake.

Manufacturer	Electronic accelerator	Fitted cost £
Autoadapt by Elap	K5 by Interface with Push Brake	£1,148
	Ko Wireless Removable by Interface with Push Brake	£1,325
Brig Ayd	Electrical Trigger Throttle and Brake System for Fly by Wire	£350
BAS(NW) LTD	Over Ring Accelerator with Push Brake	£495
Guidosimplex	Ghost Rotating Electronic Under Ring (Interface) with Lateral Fitting with Mechanical Brake	£600
	Electronic Over/Under Ring Accelerator with Mechanical Brake	£650

Remote control devices

If you have limited movement in your upper body, you could benefit from infrared controls. Once installed to the steering wheel, these controls allow for basic car functions, such as the horn, windscreen wipers and lights, to be operated by a single control pad, making it safer and more comfortable to drive.

Manufacturer	Remote control devices	Fitted cost £
Alfred Bekker	12 Way Remote Control Device with Self Cancelling Indicators	£99

Wheelchair stowage – in car system

If you can't lift your wheelchair into the boot of your car, a hoist which stores your wheelchair in your car could be the solution. These wheelchair stowage systems can be a great help by taking the weight of the wheelchair and manoeuvring it effortlessly for you via a remote control. The size and weight of your wheelchair or scooter will affect the type of hoist you need, and the type of hoist you need will affect your choice of car. The price of the boot hoist includes a compatible tie-down to secure the wheelchair or scooter in the back of the car and most hoists also come with a suitable lifting bracket. Some hoists can be transferred to your next car, speak to your adaptation installer for further details.

Manufacturer	Wheelchair stowage – in car system	Fitted cost £
Alfred Bekker	115kg Platform Lift (Backpacker)	£150
Autoadapt by Elap	40kg 2 Way Boot Hoist (Carolift)	£360

Techmobility	40kg 2 Way Boot Hoist	£55
	70kg 2 Way Boot Hoist	£230

Wheelchair stowage – roof top system

If you can't lift your wheelchair and you need the boot space of your car to store other things, rooftop wheelchair stowage could be beneficial. This system consists of an electric hoist which, when attached to your wheelchair, lifts it up and stores it in a box fitted to the roof of your car. The type, size and weight of your wheelchair will affect the type of hoist you need, and costs will vary accordingly. Rooftop stowage systems may mean that you are no longer able to park in underground car parks or spaces where there are height restrictions.

Manufacturer	Wheelchair stowage – roof top system	Fitted cost £
Autoadapt by Elap	Braun Chair Topper Roof Mounted Wheelchair Hoist System	£1,288
McElmeel Mobility Services Ltd	Braun Chair Topper Roof Mounted Wheelchair Hoist System	£1,424

Permanent swivel seats

If you're finding getting in and out of your car increasingly difficult or uncomfortable, you may benefit from having a swivel seat fitted inside your car. The way in which they operate varies from model to model, but the basic function allows the car seat to rotate by 90°, move out to beyond the sill of the door and in some cases lower or tip, to help make getting in and out of your car easier. Swivel seats can be manual or powered and can be fitted to either the driver or the passenger side. Your adaptations installer will be able to advise if a swivel seat will be suitable for your needs and whether it will be compatible with your choice of car.

Manufacturer	Permanent swivel seats	Fitted cost £
Autoadapt by Elap	Manual Swivel Seat (Turnout with Bev Seat)	£1,697
	Manual Swivel Seat Ford B Max (Turnout with Bis Seat)	£800
Autoadapt by Elap	Programmable Electric Swivel Seat (Turny Evo with Bev Seat)	£4,654
	Manual Swivel Seat (Turnout with Compact Seat)	£1,449
Elap Mobility	Manual Swivel Seat (Rotating)	£800
	Manual Swivel Seat (Rotating with 2 Arm Rests)	£940
Guidosimplex	Programmable Electric Swivel Seat (Dtran Basic)	£2,750
	Programmable Electric Swivel Seat (Rtran Aluminium)	£2,000
	Programmable Electric Swivel Seat (Dtran Excellent)	£3,400

Wheelchair swivel seats

A wheelchair swivel seat enables you to move in and out of the car without needing to rise from the seat. Once locked in position, the actual seat itself is transferred from the wheelchair base unit to a swivel base inside the car, all without the wheelchair user having to move position. It's easy and comfortable for both the passenger and the person assisting. The wheelchair base unit is then stored in the car boot. There are both manual and powered wheelchair options available. Like permanent swivel seats it's worth checking with an installer if this adaptation is compatible with the car of your choice.

Manufacturer	Wheelchair swivel seats	Fitted cost £
Autoadapt by Elap	12" Carony with Compact Seat and Turnout Manual inc Anti Tip	£2,548
Guidosimplex	Wheelchair Swivel Seat System (12inch Gtran)	£1,370

Electric person hoist

If you are a wheelchair user, another option for accessing the car is via an electric person hoist, which physically lifts you into the car. A specially designed canvas sling is put in position with very little movement required from the wheelchair user. Heavy duty hooks in the sling are then slipped onto the hoist and the hoist is raised electronically.

Manufacturer	Electric person hoist	Fitted cost £
Autochair Ltd	Person Lift Transferable (Milford Eco) up to 149kg	£275
	Transfer Kit For Person Lift (Milford Eco)	Nil
BAS(NW) Ltd	Person Lift (Handilift) up to 110Kg	£175
	Person Lift (Handilift) Hinged Door Bracket Up To 80Kg	£125

General

There are a number of different types of adaptations available to choose from, all of which have been designed to help improve or enable your travel experience. For more information, visit [motability.co.uk](https://www.motability.co.uk).

Manufacturer	General	Fitted cost £

Jim Doran Hand Controls	Electric Handbrake	£375
Various Manufacturers	Easy Release Handbrake	From Nil
	Pedal Guards	From Nil

Transfer plates

Transfer plates assist in accessing the vehicle from a wheelchair by bridging the gap between the wheelchair and the car seat. This adaptation can be fitted on the driver or the passenger side. Your adaptations installer will be able to tell you if this is suitable for your needs and will also be able to advise whether it will be compatible with your choice of vehicle.

Manufacturer	General	Fitted cost £
Autoadapt by Elap	Transfer Plate (Manual)	£9
	Transfer Plate (Electric)	£790
Autochair	Transfer Plate (Turbo Slide)	£75
Guidosimplex	Transfer Plate (Seg Seat)	£9

Wheelchair Accessible Vehicles (WAVs)

Did you know that the Motability Scheme also offers a range of over 500 Wheelchair Accessible Vehicles which have been specially converted to enable you to remain in your wheelchair when travelling? The vast majority of our customers choose to lease a brand new WAV which are available on a five year, 100,000 mile lease; however we also offer a limited number of Nearly New WAVs on a three year, 60,000 mile lease – see page 35 for more information.

Over the next few pages we provide a short summary of our WAV options, highlighting the key differences between each model. Depending on the car or van used for the WAV conversion and the company that has converted it, there is likely to be lots of other small differences that could make the difference between one that is suitable and one that is not. The only way to see which WAV is right for you, is to contact the WAV suppliers who

will be able to provide demonstrations of different WAVs at your home.

To find out more we highly recommend that you visit motability.co.uk/wavs or call **0800 093 1000** and request a copy of 'Your guide to Wheelchair Accessible Vehicles'.

1 Seats

The number of seats fitted as standard including space for the wheelchair user.

2 Lowered floor and ramp length

If a WAV has had its floor lowered, the angle of the ramp will be less steep, potentially making entry easier for the carer. This will also have a bearing on the length of the ramp.

3 Seated height

This measurement gives the maximum possible headroom for entry into the WAV at the point of the door frame, including a 50mm buffer.

4 Ramp or lift

Almost all small WAVs are fitted with a ramp while, large WAVs tend to have a lift. Lifts are generally the more expensive option.

5 WAV size

We organise our WAVs into size categories: small (S); medium (M); large (L).

6 Position

Almost all WAVs position the wheelchair user towards the rear of the vehicle, however a few have been adapted so the wheelchair user can sit upfront next to the driver. These are listed

as UFP within the vehicle descriptions, but you should be aware that they are a more expensive option. We organise our WAVs into size categories: small (S); medium (M); large (L). Additionally, we offer a range of Drive from Wheelchair WAVs, which are converted in two different ways: Internal Transfer (listed as IT) which allow the wheelchair user to transfer directly into an adapted driver seat; and Drive from Wheelchair (listed as DFW) which allow the vehicle to be driven directly from the wheelchair. As these vehicles have complex adaptations to suit your individual needs, they tend to have a higher Advance Payment.

Here are some examples of the WAVs currently available

Small Wheelchair Accessible Vehicles

From
£1,195
Advance
Payment

- Conversions available include Berlingo, Caddy, Connect, Doblo, Partner and Qubo
- All have a ramp and lowered floor to maximise headroom and minimise ramp angle to make it easier to get in and out
- Usually seat up to four people including the wheelchair passenger and driver

Medium Wheelchair Accessible Vehicles

From
£2,695
Advance
Payment

- Conversions available include Caddy Maxi, Custom, Grand Connect, NV200, Trafic, Vivaro, Alhambra and Sharan
- Most conversions have a ramp but some have a lift instead
- Usually seat a minimum of five people including the wheelchair passenger and driver

Large Wheelchair Accessible Vehicles

From
£5,495
Advanced
Payment

- Conversions include Boxer, Ducato, Master and Movano
- All conversions have a lift, rear heating and air conditioning as standard and can accommodate larger and heavy powered wheelchairs
- Wide range of passenger seating options available

Plus: Hundreds of other small, medium and large WAVs available, see prices at [motability.co.uk/wavs](https://www.motability.co.uk/wavs)

Different sizes of WAVs

WAVs will vary according to size and style, ranging from small to large – to help you consider what will suit your needs, we've included a size category on our WAV pricing pages. We've also provided an example of a seating layout for each different size of WAV to give you an idea of what's available.

Small

Smaller WAVs normally have a ramp rather than a lift to allow access. They usually have a lowered floor to give more headroom inside the vehicle and reduce the angle of the ramp making it easier to get in and out.

Medium

A medium WAV is more suitable for a larger wheelchair or if you need to carry equipment. Most will have a ramp but some are available with a lift instead.

Large

Large WAVs are a good option if you have a very large or heavy wheelchair or if you need to carry lots of equipment. They are normally fitted with a lift to make entry easier.

Nearly New WAVs

If you would prefer a WAV on a shorter three year lease, a lower Advance Payment or need a quicker delivery time, then perhaps our Nearly New WAV option would suit you? Each Nearly New WAV is no more than three years old, has low mileage and has been carefully checked by a Motability Scheme approved supplier. We have included example pricing, however as stock is limited and availability varies across each supplier, you will need to contact the WAV suppliers directly to find out which WAVs are currently available.

Small WAVs

Advance Payments from £0

Qubo	From £0
Partner/Berlingo	From £0
Doblo	From £0

Medium/Large WAVs

Advance Payments from £895

Expert/Caddy Maxi	From £895
Trafic/Vivaro	From £1,295
Boxer/Master	From £1,295

Some suppliers work with a network of regional dealers to supply and support your WAV. For a full list of WAV suppliers and information on what they can provide, visit motability.co.uk/findadealer or call **0800 093 1000**.

WAVs that wheelchair users can drive

There are two main conversion types: you can transfer into a standard or adapted driver seat from your wheelchair (listed in the description as IT) or the vehicle can be driven directly from your wheelchair (listed in the description as DFW). Because these vehicles have additional bespoke adaptations to allow you to drive independently, they tend to have a higher Advance Payment than a passenger WAV.

To browse our complete range visit motability.co.uk.

Considerations

- More independence
- Higher Advance Payments
- May require additional driving adaptations

The value of worry-free motoring

We are always working to offer consistently good customer service at an affordable price.

The Motability Scheme's all-inclusive leasing package could save you money when compared with buying a new car outright using a supermarket loan – see how you could save over £5,000 on a Nissan Qashqai 1.2 Acenta Smart Vision Pack in the table below!

**Save
£5,888.34**
when you lease
this car through
the Motability
Scheme

Nissan Qashqai 1.2 Acenta Smart Vision Pack 	Leasing with Motability Scheme ¹	Purchasing car outright using a supermarket loan ²
Lease/finance costs:		
Deposit or Advance Payment	£0.00 ³	£0.00
Monthly Payments (x36)	£253.41 ⁴	£579.46
Total finance cost you pay over 3 years	£9,122.88	£20,860.56
Plus, running costs:		
3 years insurance and breakdown ⁵	Included	£2,328.81
3 years maintenance ⁶	Included	£721.85
Total lease/finance and running costs over 3 years:	£9,122.88	£23,911.22
Resale value of car at end of 3 years	n/a ⁷	£8,900 ⁸
Total cost less value of car when sold at 3 years ⁹	£9,122.88	£15,011.22
Total you save through Motability Scheme	£5,888.34	

Points to note:

1. The Motability Scheme price includes a three year package of insurance, loss and damage protection, service and maintenance costs, RAC breakdown recovery, tyre and windscreen replacement.
2. Outright purchase using loan from Sainsbury's Bank at 3.2% APR fully repayable over 36 months (source: sainsburysbank.co.uk 02/09/2016). Assuming a purchase price of £19,879 based on an average of the What Car? Target Price (02/09/2016) and leading online retailer Parkers Target Price (source: Parkers.co.uk 02/09/2016).
3. This Advance Payment is available between October 2016 – December 2016.
4. Average expected monthly payment of the HRMC of DLA or the ERM of PIP over three years from October 2016, including expected inflation.
5. Three year insurance includes vehicle insurance provided by LV (£522.30 p.a.) (source: moneysupermarket.com 02/09/2016) and breakdown recovery service from the RAC (£253.97 p.a.) that is equivalent to the Motability Scheme provision (source: rac.co.uk 02/09/2016). Comprehensive insurance quote for a 57 year old unemployed male from Merseyside, 5 years no claims, £100 voluntary excess, no driving convictions.
6. Three year maintenance includes tyre cost of £100, with an average of two tyres every three years (£33.33 p.a.), average service costs during three year life of a Nissan Qashqai 1.2 DIG-T Acenta SVP from a Merseyside Dealership (02/09/2016, £149.00, £259, £149) and one MOT payment of £54.85.
7. There is no standard option to purchase the car offered by the Motability Scheme.
8. September 2016 CAP resale value for a vehicle with a 16 year plate sold in three years time, with an average of 25,000 miles covered.
9. The total cost assumes that this vehicle has either been handed back at the end of the three year lease agreement or has been sold privately at the forecast value predicted in [8] above. If more or less money is achieved on the sale of the vehicle, the total three year costs would change.

This guide uses abbreviations to describe some of the specifics about particular models of cars. To make this easier to understand they are in the following order:

Model – Engine size – Type of engine – Power output – Trim – Body style – Number of doors – Number of seats – Accessories

Not all descriptions will contain each piece of information so we have also included a glossary to help you. This can be folded into the page you are reading.

Abbreviations for model descriptions

2dr/3dr/4dr/5dr/6dr	2/3/4/5/6 doors
5/7/8/9st	5/7/8/9 seater
2WD/4WD	2 wheel drive / 4 wheel drive
AC or A/C	Air conditioning
ACS	Low speed collision avoidance system (Ford only)
BHP	Brake horsepower
CDI	Common-rail direct injection (diesel vehicle)
CDTi	Common-rail diesel turbo injection
Cnv pck	Convenience Pack (SEAT only)
CRD(i)	Common rail diesel (injection)
D-4D	Diesel engine (Toyota only)
dCi	Direct common-rail injection
DFW	Drive from wheelchair
DiG-S	Direct injection gasoline – supercharged
DiG-T	Direct injection gasoline – turbocharged
e-HDi	Efficient high-pressure diesel injection
ELWB	Extra long wheel base
Est	Estate
HDi	High-pressure diesel injection
i-DTEC	Honda diesel engine
ISG	Intelligent stop go
IT	Internal transfer
i-VTEC	Honda petrol engine
JTDm	Jet turbo diesel
kW	Kilo watt
LS	Lowering suspension
LWB	Long wheelbase
Nav	Satellite navigation
PHEV	Plug-in hybrid electric vehicle
Prk or Park	Parking sensor/camera
RW	Ramp and winch
sDrive/xDrive	2 wheel drive / 4 wheel drive (BMW only)
SL	Side lift
SS or S/S	Start stop system
ST	Sport tourer (estate)
SVP	Smart vision pack (Nissan only)
SW	Stationwagon (estate)
SWB	Short wheel base
TD(C)i	Turbo diesel (common-rail) injection
T(F)SI	Turbocharged (fuel) stratified injection
TL	Tail lift
(T)TiD	(Twin) turbo injection diesel
TSS	Toyota Safety Sense
UFP	Upfront passenger
VTi	Variable timing injection
WP	Winter Pack
